

THIS WEEK IN FOREST SCHOOL...

Year 3

Stone Age to
Bronze Age

Today we looked at stone age clay balls. We shared information about them, such as archaeologists have found many of these items and are unsure of their actual purpose. We discussed some of the possibilities and the children had a go at making their own using natural materials to make different patterns. Other children had a go at creating their own tracking messages using sticks and stones found on site. We even had a go at using a leather to draw with mud ink.
