

THIS WEEK IN FOREST SCHOOL...

Year 3

Stone Age to
Bronze Age

Today we thought about Stonehenge in our learning in Forest School. We saw pictures and shared information about what it is and why it is important in the classroom before coming outside. We also discovered how the big stones were moved across the country. The children were given the challenge to work in teams to create their own version of Stonehenge using any of the materials they could find. The children worked collaboratively, communicated well and persevered to create their final piece.
