

THIS WEEK IN FOREST SCHOOL...

Year 3

Stone Age to
Bronze Age

As we have noticed the autumn changes on site, we decided to read Little Goose's Autumn by Elli Woollard. The children collected the sweet chestnuts like the squirrels and built shelters like the beavers. Some children followed their own interests of making stick people. This took some imagination and perseverance to complete and at times children had to problem solve how items were going to be attached. Others continued in their interests of digging for stones. They are beginning to confidently identify the type of rock and explain its properties.
