

THIS WEEK IN FOREST SCHOOL...

Year 3

Stone Age to
Bronze Age

Today we started inside by looking at the development of houses throughout the Stone Age to Bronze age. The children decided to create their own Stone Age inspired jewellery and practiced their knot tying. Other children used their observational skills by using the handheld microscopes to investigate different textures and surfaces within our forest school. We also had a group that were very busy collecting leaves and discovered they could create leaf angels.
