

THIS WEEK IN FOREST SCHOOL...

Year 1 -
Plants

Today in our session we searched for pictures and sorted them into fruit and vegetables. 'Fruit has seeds inside them'. We then identified which part of the plant we ate for some fruit and vegetables. 'We eat the roots - they are carrots.' The children then had an opportunity to observe and predict some fruits to see which had seeds and which had stones inside. Then some of the children developed their fine motor skills and imaginations to create pinecone bees and constructed spaceships for an adventure. The children communicated ideas well and played cooperatively.

NOLA Focus: I
learned new skills

Curriculum Focus:
To know that fruits
and vegetables are
varieties of plants
