

THIS WEEK IN FOREST SCHOOL...

Year 1 -
Materials

NOLA Focus: I
learned new facts.

Curriculum Focus:
To build a
waterproof structure

Today our task was to make a waterproof structure. We discussed what waterproof and absorbent meant and then set to make our own structure with a waterproof roof. We investigated fabric, tin foil, tissue paper as well as other materials in Forest School and then tested them by using a watering can to create a rainstorm. We found out that: fabric was strong but absorbed the water, tinfoil was waterproof but wasn't strong and that tissue paper wasn't waterproof or strong. After, some of the children made their own log dogs. They took such wonderful pride and good care of them.
