

THIS WEEK IN FOREST SCHOOL...

Year 1 -
Plants

NOLA Focus: I
shared my ideas

Curriculum Focus:
To understand that
different plants can
grow in the same

The children discussed the different types of plants that they could see in Forest School. We identified and named plants on the rocket list as well as other plants and trees in our site. The children participated in a plant scavenger hunt and looked closely at the plants they found. From this they could describe and sort according to their features. Some of the children then made their own plant ID book. We explored looking at leaves by creating leaf rubbings.
