

THIS WEEK IN FOREST SCHOOL...

Year 1 -
Plants

NOLA Focus: I
learned new facts.

Curriculum Focus:
To identify the basic
parts of a plant/tree

We started our session by making close observations about the plants in Forest School. The children were able to compare the plants and say what was the same and different about those they explored. We checked on our seeds and nothing had grown so far. The children then drew a picture of a plant and correctly labelled it. We then discussed how the parts differed when we described a tree. The children's knowledge and willingness to share was brilliant.
