

THIS WEEK IN FOREST SCHOOL...

Year 1 -
Autumn

We began our session today by sharing *The Oak Tree* by Julia Donaldson. The children identified the oak tree on site and described its leaves. The children eagerly searched for acorns and found an oak sapling. We learned that thousands of trees grow each year because squirrels forget where they have stored their food. There was speculation, as to whether this is how the little oak came to be where it was. Children worked together as a team and persevered to create a boat like in the book.
