

THIS WEEK IN FOREST SCHOOL...

Year 1 -
Plants

Today we started the session by adopting a tree. Each child chose a tree to adopt - they then sat under it and looked at it closely, felt its bark and noticed something special about it. The children came up with some wonderful observations. We then read Sam plants a Sunflower. The children enjoyed sharing their knowledge that they had learned in Science so far. We planted some more seeds including peas and wildflowers. We are hoping that the peas will grow well so we could try them. We also had some very creative minds use our new creation station. They created flowers, plants and butterflies using natural objects.
