

THIS WEEK IN FOREST SCHOOL...

Year 1 -
Where we
live

We started our session today with a walk around the school grounds to look closely at the signs of spring. The children noticed daisies, dandelions, crocuses as well as buds on the trees. We could also hear birds singing in the sunshine. The children were very focussed and enjoyed looking closely and noticing small changes in a place that we know so well. They also did a great job at using the digital camera. Once we got to base camp we shared the story of Bears first spring. The children enjoyed listening to the story about friendship and new life appearing in spring.
