

THIS WEEK IN FOREST SCHOOL...

Reception -
Come
Outside

As we left the classroom, we noticed lots of puddles on the playground. There was lots of interest and scientific talk about what would happen to them. We explored by drawing around them with chalk. At base camp we read the story of Rabunzel - a rabbit with very long ears that lived in a tower. The children then created some towers for Rabunzel to live in. The children also created some nature Easter eggs and, as we found a basket of little chicks, the children experienced using the digital camera to take pictures of the chicks with some of the signs of spring. They really enjoyed looking closely at nature showing curiosity and awe and wonder at the new growth. We definitely have some budding photographers!

On our way in from Forest School the children noticed that two of the puddles had gone and the other two had got smaller.
