

THIS WEEK IN FOREST SCHOOL...

Reception - Amazing Animals

Today we shared the story of Owl Babies. Some children created their own owls and nests. Others had a great time building a den complete with a garage. Someone noticed a really long worm at base camp - we measured how long it was and saw it grow as it moved. It was fascinating! We talked about how we can respect all God's creatures.

Some children also spotted that a tuff spot had turned the grass yellow - we are going to check it again next week.
