

# THIS WEEK IN FOREST SCHOOL...

## Year 2 Maps

NOLA focus: I  
used the  
equipment safely.

In class, the children have been learning about compass points. We developed this learning further by using directional compasses and identified North, South, East and West. The children worked collaboratively to identify the directions and followed different sets of instructions. Some children were fascinated looking through the jewellery loupes at different fungi and ice (from the snow earlier in the week) on site. The children showed great observational skills, and the ice patterns created a great sense of awe and wonder.
