

THIS WEEK IN FOREST SCHOOL...

Year 2

*The world around
me/Bears*

In English Year 2 are using a book about bears in their English work. We started our session talking about the differences between the wild/natural habitats of different types of bears and the features of a city. The children were then given the challenge to create an island to support a bear that would have shelter, air, food and water. They were really thoughtful to the needs of each bear in its natural habitat. We also looked for the signs of spring - we used little people to create some fun photos. I think it is safe to say we have some budding photographers! It was wonderful to see them look closely at the site they know so well and notice the small changes in the seasons.
