

THIS WEEK IN FOREST SCHOOL...

Year 2

*The world around
me.*

We started the session by reading a story about den building. This inspired some of the children to create their own dens using natural materials and tarpaulins. We have also begun planting wildflowers by making seed bombs and spreading them around the site. It will be exciting to see what grows over the next few weeks and months. We talked about the reasons why we should plant seeds and the children came up with brilliant ideas such as they help bees and other insects, they give us oxygen and they look nice. Some of the children continued to enjoy using little figures to create scenes using natural materials found in Forest School.
